

SPECIALTY POLYMER COATINGS, Inc. **Innovation Is Our Specialty**

SPC is the leading North American formulator, manufacturer and distributor of State Of The Art 100% Solids (no VOC's) and High Solids (low VOC's) liquid epoxy and polyurethane coatings, which are used extensively in a multitude of industries including: the Oil and Gas Industry, Sewage Treatment, Waste Water, and Marine to name but a few.

Some of SPC's more recent innovations include: Hybrid Liquid Epoxy's for applications on Wet Substrates, Surface Tolerant Coatings designed for areas where surface cleanliness and or adequate blast profile cannot be achieved, low temperature cure epoxy coatings, high operating temperature coatings capable of withstanding in-service temperatures up to 150°C / 302°F.

SPC has a team of field technicians deemed the most knowledgeable in the coatings industry. Services provided include product and equipment certification, safety orientation, trouble-shooting, problem resolution and project management.

Whether you are seeking chemical or corrosion resistance, high operating temperature or low application temperature or substrates with less than ideal surface preparation SPC has a system for you. Our specialty is Innovation, we engineer liquid coating materials for the most demanding environments. Contact us for your next project.
