

# Specialty Polymer Coatings, Inc. Is Innovation

Specialty Polymer Coatings, Inc. (SPC) is the leading North American Formulator, manufacturer, and distributor of 100% solids (no VOC's) Liquid Epoxy and Polyurethane coatings, which are used extensively throughout the pipeline industry.

With a primary focus on the coating needs of the Pipeline Industry SPC has become one of the largest suppliers of 100% solids liquid coatings in this market. SPC products are used for the coating of Pipe, Valves, Fittings, Girth Welds and Directional Drill Pipe. SPC formulations are also considered the premier system for Pipeline Rehabilitation Programs, be it brush/roller applied, plural component spray application, or automated line travel spray application.

SPC has a team of field technicians deemed the most knowledgeable in the Pipeline Coatings Industry. Services provided include product and equipment orientation, safety orientation, trouble-shooting and problem resolution and project management.
